Properties

- Customizing environment for extensive configuration
- Integration with other ProNovia products possible
- Business add-ins for implementing customer-specific functions, interfaces and objects
- Delivered GUI language support in German, English and French
- Detailed documentation in German and English
- Authorization objects for integration into the SAP authorization concept

PRIMARY FUNCTIONS

With ProProcess, processes or sub-processes can be started rule-based and tasks can be distributed to users via SAP Business Workflow. This is particularly advantageous for the presentation of business processes.

- Distribution of tasks
- Monitoring of process progress
- Notifications to any recipient
- Reusable message texts
- Parallel processes
- Multiple process versions

By using ProProcess, you can present business processes in your company in a highly efficient and transparent way. In this way the processing of data in a high quality is ensured, known sources of error in processes are avoided.
